

## Defeating Terrorism: Shaping the New Security Environment

Defeating Terrorism: Shaping the New Security Environment presents the new standards of approaching the security needs of the twenty-first century. The authors take this volume to the next level, following on their highly successful *Terrorism and Counterterrorism: Understanding the New Security Environment*. They speak with authoritative voices that come from vast experience in the field, and their collection of the writings of leading authorities will bring meaningful understanding to all readers of this volume. Experts in many areas of antiterrorism have analyzed the threats that now have varied faces on a domestic and global level: regional terrorist movements, weapons of mass destruction, and new tactics such as suicide bombers, among others. Strategies to counter these threats demand a flexible approach and cooperation at multiple levels. The efforts of all sectors -- military intelligence, technology, business, government agencies from local to international -- are presented in this comprehensive volume, so that readers become aware of the scope of the problem and how it will be successfully addressed.
